Final-year Computer Science Engineering student at AMC Engineering College (CGPA: 9.28/10) focused on AI/GenAI and full-stack development. Experienced in building LLM-powered applications, RAG systems, local AI solutions, and production-oriented web platforms.

EDUCATION

AMC Engineering College, Bengaluru

Bachelor of Engineering in Computer Science & Engineering

2023 – Present | CGPA: 9.28

St. Joseph's Boys High School, Bengaluru

Higher Secondary Education (PCMC)

2021 – 2023 | 95%

Outreach School, Bengaluru

Secondary Education (SSLC)

2020 – 2021 | 95%

PROJECTS

OpsLens — Evidence-Driven AI Incident Investigation Copilot | [GitHub](#) | [Live Demo](#)

Tech Stack: Python, Streamlit, FAISS, Sentence Transformers, Groq, PyPDF, DDGS

- Built a RAG-based incident investigation system using technical runbooks and incident history.
- Added evidence verification and live web-search fallback to reduce hallucinations.

NexaFlow AI — AI Customer Support Chatbot | [GitHub](#) | [Live Demo](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, Groq LLM API

- Built an LLM-powered chatbot with intent classification and persona-based responses.
- Added automatic ticket creation, chat history logging, and an analytics dashboard with voice input.

PRISM — Privacy-Preserving Digital Twin | In Development

Tech Stack: Python, Ollama, Mistral, React.js, FAISS

- Built a local LLM assistant with long-term contextual memory.
- Implemented FAISS-based retrieval while keeping AI inference locally hosted.

Bio-Mark Guard — Biometric Digital Watermarking System | [GitHub](#) | [Live Demo](#)

Tech Stack: React.js, TypeScript, Vite, Tailwind CSS

- Built a biometric document protection system using Fuzzy Vault cryptography.
- Added invisible watermarking and hash-based tamper detection.

CERTIFICATIONS

- [Introduction to Machine Learning – NPTEL Elite \(70%\)](#) | [Topper - Top 5%](#)
- [Compiler Design – NPTEL Elite \(69%\)](#)

TECHNICAL SKILLS

AI/GenAI: LLMs, RAG, Embeddings, FAISS, Streamlit, Ollama, Mistral, Groq

Web Development: React.js, Node.js, Express.js, REST APIs, Tailwind CSS

Programming Languages: Python, Java, JavaScript, C

Databases: MongoDB

Deployment: Vercel, Render

Developer Tools: Git, GitHub, VS Code

Core Qualities: Problem Solving, Analytical Thinking, Team Collaboration, Communication

ACHIEVEMENTS

- Research Paper Presentation — ICAECT 2026
- Best Student Award for outstanding academic and overall performance
- Decodex Coding Competition — Final Round Qualifier
